Talapatram

Indian Languages' Editing and Keyboard Layout Software
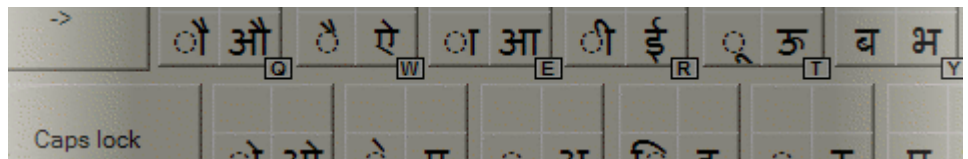

Talapatram

First Ever Open Source Software of its kind.

Download for free

Take part in its development.

Hosted On

Google Code

Talapatram is an Indian Languages' Editing Software with On-Screen Dynamic Keyboard Layouts in 11 different languages.

Using this software you can type directly in any of the 11 Indian languages Bengali, Farsi, Gujarati, Hindi, Kannada, Malayalam, Marathi, Punjabi, Tamil, Telugu and Urdu or in any combination of these languages. Unlike typical transliterator softwares, it acts like a Virtual Keyboard for your PC in the required language.

It is hosted on **Google Code** and is an Open Source software free to use and download for everyone. If you are interested, you can also take part in its development.
